ACCOUNT NUMBER:

00408-180165-430630-000000

STAFF COMMENTS AND BACKGROUND INFORMATION:

Fortinet firewalls are essential in enterprises to bolster network security. They serve as a frontline defense by monitoring network traffic, blocking unauthorized data packets, and detecting and preventing intrusions in real-time. These firewalls offer application control and web filtering capabilities, helping organizations manage and secure network resources. They support secure VPN connections for remote access and ensure optimized network performance through traffic shaping and QoS policies. Fortinet firewalls also provide extensive security event monitoring, compliance reporting, and threat intelligence, making them versatile tools for regulatory compliance and threat prevention. Their scalability, regular updates, and multi-layered security approach contribute to their popularity in safeguarding enterprise networks from cyber threats.

As part of the infrastructure refresh project, the Information Technology department will be renewing all existing maintenance and security services subscriptions with coterminous end dates with all appliances in operation. Competing quotes were requested from Dyntek, SHI, and Fortinet direct with Dyntek being the lowest responsive and responsible vendor.
