Office of the City Manager

April 2, 2025

Honorable Mayor Goynes-Brown and Members of the City Council

SUBJECT: Fiscal Year 2026-2030 Capital Improvement Plan

The Capital Improvement Plan (CIP) is an investment in the future of our community. It is with our commitment to the future that we bring to you the fiscal year 2026-2030 CIP for the City of North Las Vegas.

The City of North Las Vegas stretches across the northern rim of the Las Vegas Valley. The City, which was incorporated in 1946, encompasses approximately 101 square-miles within Clark County in Southern Nevada. The City estimates that by the time it reaches build out, its population will be 410,000. Serving the growing population is a critical challenge that must be addressed by balancing the needs of the community with available financial resources.

This document presents the plan for major public facility improvements that will be implemented over the next five fiscal years. The projects included in the fiscal year 2026-2030 CIP are consistent with the City Council's priorities and address Planned and Quality Growth, Redevelopment and Revitalization, Parks and Recreation, Community Improvement Projects, Public Safety Facilities, and Economic Redevelopment.

Background and Summary

Although there are many resources that fund CIP projects, Property Tax and Consolidated Sales Taxes are significant for two reasons. First, these sources contribute to the construction of CIP projects. Secondly, they are critical as they fund the operating and maintenance associated with the completion of CIP projects; such as maintaining roadways, flood channels, new parks, buildings and recreational facilities.

The CIP presents only those major improvements that are viewed as most urgently needed and which can be funded from available revenue sources. As the City continues to grow, all projects are reviewed and prioritized to address the infrastructure needs of the City to support this growth.

The system of capital expenditure management is important because: 1) the consequences of investments and capital projects extend far into the future; 2) decisions to invest are often irreversible; and 3) such decisions significantly influence a community's ability to grow and prosper.

CIP Budgets

CIP EXPENDITURES BY CATEGORY FY 2026-2030

The selection and evaluation of capital projects is a difficult task that involves some speculation and ability to make estimates, which to some extent are based on historical perspectives. A “Capital Project” is of relatively high monetary value (at least \$25,000), has a long life, and results in the creation, or revitalization of a fixed asset. A capital project is usually relatively large compared to other “capital outlay” items in the annual operating budget. This is the basic type of definition we have used to guide the preparation of the capital program budget. The 2026-2030 Capital Improvement Plan amounts to \$1,003,391,389. The fiscal year 2026 capital program amounts to \$271,412,084 or 27.05% of the overall five-year program.

Upon completion, the projects in the five-year plan will require an estimated \$3,514,000 in operation and maintenance costs, of which \$10,000 will impact the FY 2026 budget. These costs will be borne primarily by the General Fund.

Revenue and Other Financing Sources

Included in the CIP are various funding sources including intergovernmental revenue, grants, general obligation bonds and pay-as-you-go financing which include dedicated property taxes, development fees, utility rates and available fund balances. The following summarizes the major funding sources for the five-year CIP:

Bureau of Land Management (BLM) The BLM provides funding for parks and recreation projects through the Southern Nevada Public Lands Management Act reinvestment criteria. These projects include new and refurbished parks and trails. The City pays for expenditures upfront and submits quarterly documentation of payments to the BLM for reimbursement. (\$64.8M)

Clark County Regional Flood Control Funding received from this source is restricted for flood control projects within the City’s established 10-year Plan. (\$150M)

General Fund The General Fund accounts for activity associated with traditional city services such as police, fire, parks & recreation, planning & economic development, public works, and general administration. This fund handles day to day operational expense, but will begin to include some funding for capital projects as other funding sources are exhausted. (\$92.6M)

Grants/State Revolving Loan Various grants and loans can be secured to assist with the funding of specific projects. (\$183.0M)

Nevada Department of Transportation Funding received from this resource is generally allocated to projects that are related to arterial street engineering or construction and intersection improvements. (\$16M)

Park District & Support Funds Park District funds are received as a result of the residential construction tax. These funds are recommended for capital improvements to parks within the district in which the revenue is received. (\$4.0M)

Regional Transportation Commission (RTC) The RTC manages federal and local funds that are committed to our regional transportation systems. Transportation projects that have local or regional significance are recommended to RTC for funding. (\$112M)

Southern Nevada Water Authority (SNWA) The SNWA provides a \$3/square foot rebate for turf removal. This rebate will supplement funding for various Park improvement projects. (\$1.3M)

CITY OF NORTH LAS VEGAS

Streets, Fire and Parks Tax Override Fund In June 2001, voters approved the expansion of the tax override to include the acquisition of land, buildings and equipment for fire and park facilities. The tax was originally approved for the purpose of street construction and street maintenance. (\$45.7M)

Motor Vehicle Fuel Tax Fund These funds are restricted by NRS 365 to be used only on street related projects. (\$13.2M)

Traffic Cost Participation Agreements Developer contributions dedicated for specific street intersection traffic signals. (\$12.5M)

Utility Enterprise This enterprise fund is similar to a private business. Upgrading the City's utility infrastructure reinvests a portion of the City's water and wastewater revenue from its services to customers. (\$149M)

Vehicle Replacement Reserves In FY 2012, a vehicle replacement program was established through charging the departments to establish reserves within the Motor Vehicle Fleet fund to cover future replacement vehicle needs. (\$59.5M)

Conclusion

FY 2026-2030 REVENUES BY SOURCE

This plan focuses attention towards community goals and needs, reduces scheduling problems, and achieves the highest public benefit within limited financial resources.

Finally, the projects identified in this document are the result of many hours of deliberate thought by many people. It is fitting to recognize the efforts of each of the department directors who have been engaged in this initiative and commend them for their input. I would like to particularly commend the Public Works and Finance Departments for their excellent performance in constructing this document.

Respectfully submitted,

Micaela Moore
City Manager / CEO

Carey-Lake Mead Detention Basin Improvements and Outfall Modification

Project #: 10555

Project Cost: \$2,150,000
Previous Cost: \$150,000
O&M Impact: \$0
Department: Public Works
Ward: 2
Location: Carey Avenue and Simmons Street

Project Description: This project involves the design and construction of detention basin improvements (including a water quality feature), as well as a secondary 48" RCP outlet for the Carey-Lake Mead Detention Basin. This project is identified in the 2018 Clark County Regional Flood Control District Master Plan as facility number LVLM 0221.

Lake Mead Drain to Las Vegas Wash

Project #: 10456

Project Cost: \$36,200,000
Previous Cost: \$1,500,000
O&M Impact: \$0
Department: Public Works
Ward: 1
Location: Lake Mead Boulevard, Civic Center to Las Vegas Wash

Project Description: This project includes design and construction of approximately 2,400 feet of 12 foot by 4 foot and 2,600 feet to 12 foot by 6 foot reinforced concrete box storm drain. This project is described in the Clark County Regional Flood Control Master Plan as Facility Numbers LVLE 0000 and LVLE 0047. In addition to the flood control facilities, this project will rehabilitate the roadway and upgrade water/sewer utilities within the project limits.

Las Vegas Wash Cartier Channel

Project #: 10566

Project Cost: \$54,500,000
Previous Cost: \$1,000,000
O&M Impact: \$0
Department: Public Works
Ward: 1
Location: Las Vegas Boulevard-between Lake Mead Blvd and Carey Ave and extending north towards Cartier and east to the Las Vegas Wash

Project Description: This project consists of the design, right of way acquisition and construction of RCB and channel improvements in two phases. Phase 1 is included in the "Las Vegas Boulevard Improvements " project (CIP20015). Phase 2 will extend those improvements to the Las Vegas Wash. This project is identified in the Clark County Regional Flood Control District Master Plan Update as Facility LVCC 0000, 0030, and 0035.

Flood Control

Range Wash - Beltway Conveyance & Collection System - Pecos

Project #: 10389

Project Cost: \$20,300,000
Previous Cost: \$1,000,000
O&M Impact: \$0
Department: Public Works
Ward: 1, 4
Location: CC-215 & Pecos Road

Project Description: The project involves design and construction of storm drains at the intersection of CC-215 and Pecos Road. This system is designed to convey flow from the Beltway Channels to both sides of Pecos Rd. This project was identified in the 2018 Clark County Regional Flood Control District Master Plan Update as Structure Nos. RWWE 0500, RWWE 0518 through 0550, RWBW 0011, RWBW 0013, and RWBW 0035 through 0083.

Flood Control

Vandenberg Lined Channel

Project #: 10584

Project Cost: \$1,300,000
Previous Cost: \$0
O&M Impact: \$0
Department: Public Works
Ward: 1
Location: Vandenberg - Lone Mountain Road to Craig Road

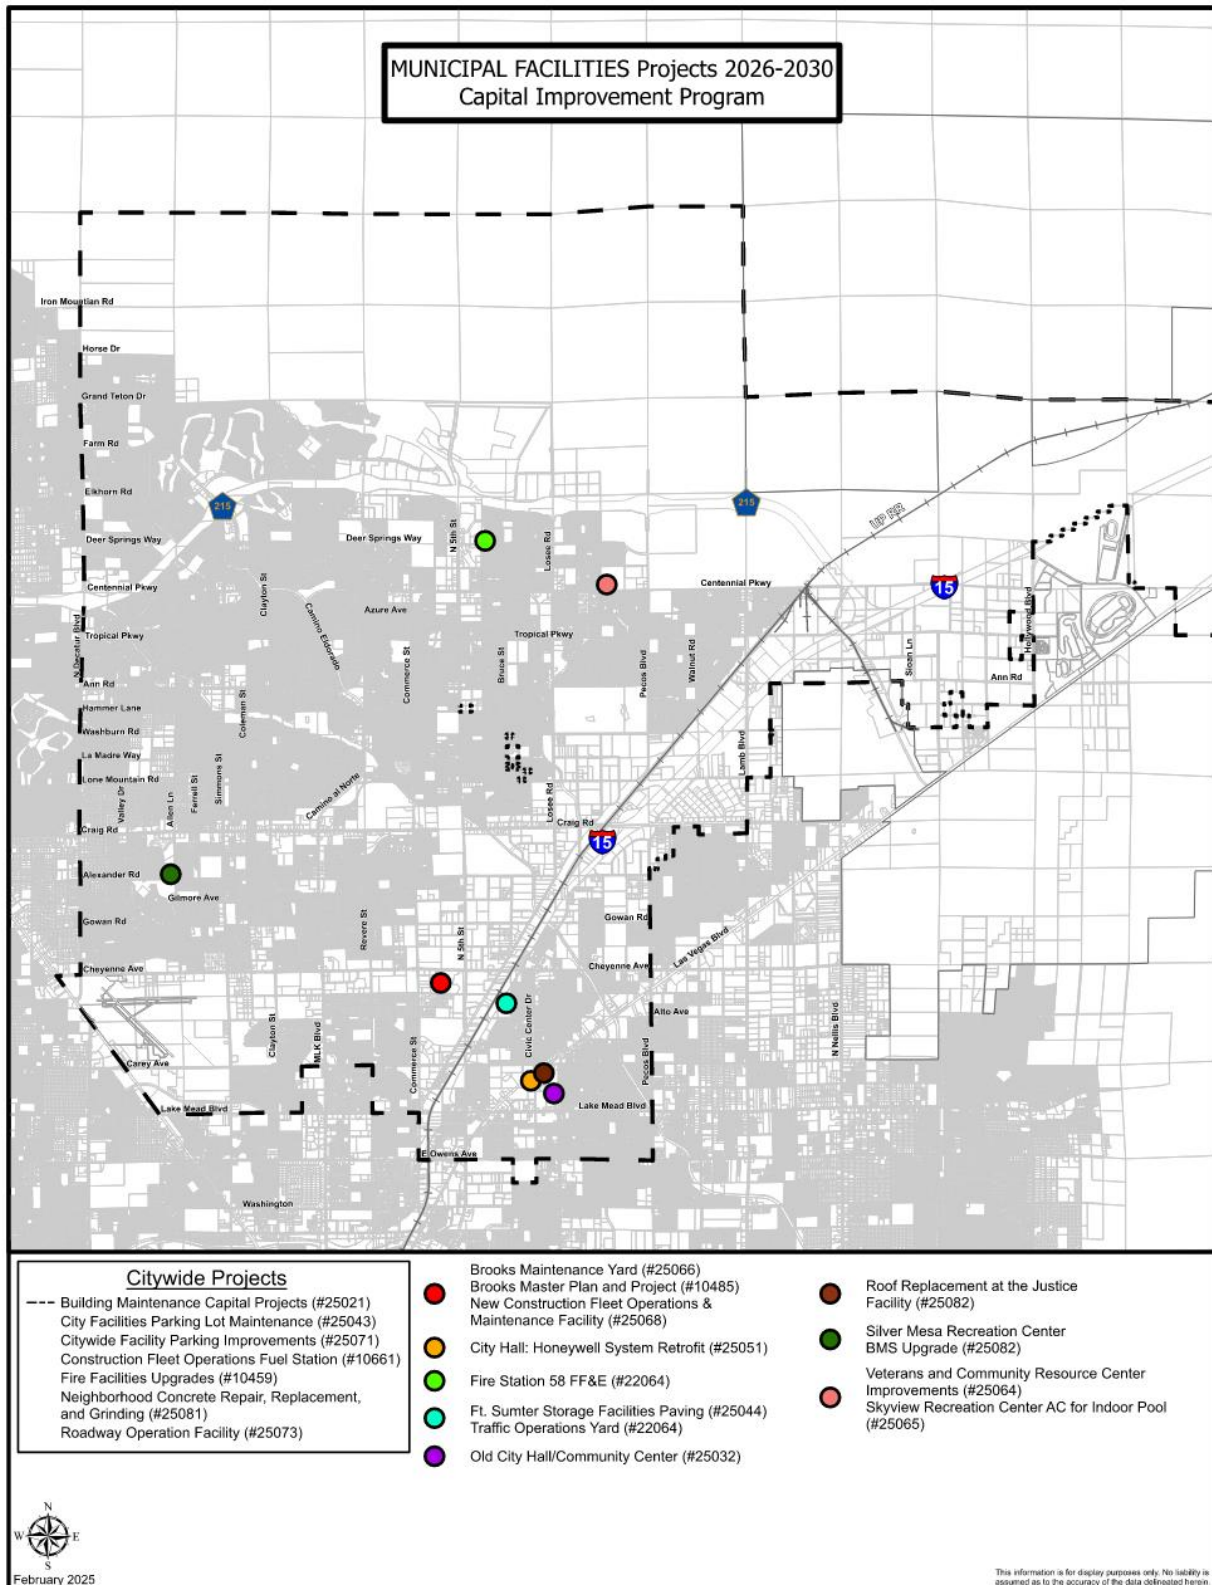

Project Description: Remove and replace existing concrete from Mitchell to Craig Road. Funding will be supported by the Flood District that was included in this year's annual maintenance contract. However, due to the existing workload, the first phase of the project was not started this FY. It was targeted to be completed in a 3-year phase due to the size of the Project.

Brooks Master Plan and Project

Project #: 10485

Project Cost: \$3,703,679
Previous Cost: \$379,000
O&M Impact: \$0
Department: Public Works
Ward: 2
Location: 50 East Brooks Avenue

Project Description: To evaluate the current layout of the Brooks Yard area and create a master plan to re-align perimeter fence and area within the property boundaries. This will also include remodeling assigned yard sections to various divisions throughout the City.

In addition, a perimeter/retaining wall will be added to the property. Also, a new asphalt driveway/parking areas and striping will be included.

New Construction Fleet Operations Fuel Station

Project #: 10661

Project Cost: \$2,000,000
Previous Cost: \$0
O&M Impact: \$0
Department: Vehicles & Heavy Equipment
Ward: 2
Location: To be determined

Project Description:

- Currently the City does not own or have its own bulk fuel supply source.
- From December 2023 through December 2024 NLVPD and NLVFD used a combined total of 348,074 gallons of fuel at a total cost of \$1,385,424.86.
- This Fuel Station would serve/fuel all of the City's Fleet and Public Safety vehicles.
- In addition, it is imperative that the City has its own refueling station in order to stay operational during emergencies. Having our own organic fuel source will give the City the ability to continue refueling public safety vehicles during fuel outages and hindered fuel supply from the state of California, our main fuel source.
- This project aligns with Objective #2 "Expand and modernize public safety facilities and equipment" of Goal #3 "Community Safety" in the City's Strategic Plan

Project:

- On-Site Refueling Station located on City property to be determined
 - ~8,000-gallons, above ground two products, (unleaded & diesel) with pump pad
 - ~Secure compound large enough to accommodate refueling of City fleet and public safety vehicles
 - ~Include WEX integration system

New Construction Fleet Operations & Maintenance Facility

Project #: 25068

Project Cost: \$35,600,000
Previous Cost: \$0
O&M Impact: \$0
Department: Public Works
Ward: 2
Location: Utilize existing Brooks Annex to construct a new Fleet Operations & Maintenance Facility

Project Description: Existing service garage was built in 1965 and is 7,272 square feet with an additional 1,800 square foot fire bay. The vehicle fleet at this time was estimated to be over 100 vehicles and equipment. The current fleet size is 1,140 vehicles and equipment and continues to grow with the increase of manpower citywide. A new ADA compliant service garage with modern automotive support equipment, offices, breakroom, and bathrooms is needed.

- 32,000 square foot, 22-bay fleet service garage, includes administrative office space, centralized parts/tool room for the main shop which includes two bays for heavy duty vehicles
- 14,000 square foot, 4-bay shop for Fire Fighting vehicles located within the same compound
- On-Site Refueling Station & Vehicle Wash rack
 - ~20,000 gallon Two Product Tank w/Pump Pad
 - ~Vehicle Wash Rack & Pad to clean fleet vehicles
 - ~Secure compound large enough to accommodate vehicles awaiting maintenance, new vehicles awaiting to be put in-service and vehicles awaiting auction

New Fire Station (59) FF&E

Project #: 22079

Project Cost: \$1,200,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: 1
Location: To be determined

Project Description: This project is to budget for furniture, fixtures, and equipment for the potential addition of a new fire station proposed along the I-15 corridor to serve to Apex and Speedway areas of North Las Vegas.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

215 Northern Beltway Trail Phase 1 and Phase 2

Project #: 10592

Project Cost: \$7,225,995
Previous Cost: \$600,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 3, 4
Location: Adjacent to Northern Beltway between Decatur and North 5th Street

Project Description: Phase 1: The City of North Las Vegas is proposing to extend the multi-use Beltway Trail from Decatur Boulevard to North 5th Street which will include constructing approximately 4.5 miles of asphalt trail with lighting, interpretative signage, wayfinding signage, regulatory signage, benches and landscaped with native vegetation/drought tolerant plants. This extension will be the first component of the regional trail constructed within the city. The northern portion of the Beltway Trail will follow the Bruce Woodbury Beltway east, offering exceptional views of the Sheep Mountains that flank the city. The project will also include interpretive/education signage highlighting the Sheep Range, Desert National Wildlife Refuge and the Tule Springs Fossil Beds National Monument.

The urban trail will provide a convenient active transportation route for commuters, as well as a recreational escape. Active transportation is defined as human powered modes of transportation, primarily walking and bicycling. Project cost is \$5,946,000.

Phase 2: Continues the connection of asphalt trail from North 5th St to Losee Rd. Distance is approximately 1.5 miles with similar amenities to phase 1 listed above. Project cost is \$2,075,995.

Cheyenne Sports Complex Playground & Asphalt Improvements

Project #: 10594

Project Cost: \$16,116,000
Previous Cost: \$4,776,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 1
Location: Cheyenne Sports Complex

Project Description: The Land and Water Conservation Fund has agreed to match investment from City of North Las Vegas into various park facility projects. Cheyenne Sports Complex will have new asphalt paved for its outdated and worn lots and also resources for related landscaping improvements (\$600,000 with \$300,000 matched by LWCF). Cheyenne Sports Complex will also see various other enhancements, such as a soft surface playground (\$375,000); Replacement to rocks, turf, and trees (\$250,000); Irrigation upgrades (\$50,000); Shade and bleacher structure replacements (\$275,000); and concrete repairs (\$50,000).

Hill removal, splash pad installation, dog park, fitness court, and replace parking lot asphalt. This project will also allow for connectivity between the various active areas of the park and will improve the parking areas, thereby making it safe and accessible for all. The new park will also address the needs of the CSN-North Las Vegas campus students, who are searching for nearby open spaces to recreate, enjoy the outdoors, and continue making upgrades to their home collegiate fields.

This project will add \$1,000,000 towards a new track soft surface which would make this facility the second only public track in the Las Vegas Valley. We will surface a few of the underused tennis courts to add replacement pickleball courts (\$800,000), add bleacher seating (\$110,000), and upgrade the sport lighting to energy efficient LEDs (\$1,567,000).

Children's Science and Nature Park

Project #: 10645

Project Cost: \$32,329,248
Previous Cost: \$550,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 3
Location: Near the Northeast Corner of Decatur & Horse

Project Description: This is a 14-acre science and nature park near the northeast corner of Horse and Decatur, adjacent to the Tule Springs Fossil Beds National Monument. This location is ideal for the park to provide the setting for STEM (science, technology, engineering, and math) learning to educate youth of all ages from elementary to high school seniors. This park will provide a unique outdoor learning venue in partnership with UNLV and Clark County School District. Park amenities include: 1,200 square foot visitor center operated with renewable energy; 1.25 miles of accessible walking paths lined with desert landscape and trees; benches; shade structures and 27 STEM related life-size exhibits throughout the park.

Craig Ranch Regional Park

Project #: 10617

Project Cost: \$29,733,319
Previous Cost: \$5,000,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 2
Location:

Project Description: CIP has various components that will create new park amenities and improve existing ones at Craig Ranch Regional Park. Craig Ranch Amphitheater (Box Office, entry, and seating upgrades), with increased use of the amphitheater, several items have been identified to improve access and the experience of the facility. The Box Office and entry will be relocated to create a larger gathering space and improve functionality for ticket acquisition as well as enhanced access to the site and seating. Current turf grass will be converted to artificial turf in order to reduce water consumption and maintenance as well as enhance the user experience. New concrete sidewalks will increase access to seating and deter patrons from walking through landscaping.

SNPLMA Round 19 Funding \$24,624,985: 20-Acre park expansion to the west of existing park along MLK Drive. Amenities include: splash pads; nature trails; multi-court tennis/pickleball complex; picnic ramadas; and playgrounds.

Event Apparatus Equipment including Forklift and Light Tower, LED Lighting, Playground improvements, Mobile stage, roof/video wall/lighting/sound system, splash pad upgrade.

AMP Technology Cleanup: Focus on wiring, staging, and overall upkeep of the AMP equipment in order to ensure it functions properly when needed and achieves its full life cycle

Fiber to New Fields: With the building of the new fields in the southeast corner of Craig Ranch, if/when there is a need for technology to be installed the necessity of connectivity will be there. By running fiber to a facility in the southeast corner it would give the City the ability to facilitate future technology needs at the fields in a much more efficient manner.

Previous Cost: \$804,641
O&M Impact: \$0
Department: Parks & Recreation
Ward: 4
Location: Goldcrest Park

Project Description: CNLV - SPARKLE Initiative intends to provide improvements to the parks located South of Craig Road. These Southern parks were selected due to their age and general condition.

Re-landscape Park sign area planter
 Irrigation Upgrades
 Turf Renovations
 Prune Existing Trees
 Install additional trees and plant material lantana and boulders
 Additional lights and upgrades to LED
 Replace drinking fountains
 Install swings (2 child seat and 2 belt swings)
 Install concrete park benches
 Install Barbecues
 Concrete trash cans
 Resurface parking lot
 Playground Rehab
 Turf Abatement/Conversion

Kiel Ranch 7 Acre Development & Phase IV

Project #: 10637

Project Cost: \$7,056,600
Previous Cost: \$2,590,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 3
Location: Kiel Ranch

Project Description: The City of North Las Vegas will design and construct approximately 7 acres of the historical park with community amenities that will integrate learning and play. This will include educational play structures; areas for observation and reflection; tactile objects on panels; public art; interpretive games; picnic facilities; landscaping; restrooms and entry features. The Park will serve the surrounding community that is economically challenged; the City which has a minority-majority population; and visitors from the across Las Vegas Valley. The anticipated deliverables are as follows: Up to three family picnic shelters with enhanced paving, Up to two group picnic shelters with enhanced paving, Site furniture including up to 16 picnic tables, 40 benches, 5 BBQs, 25 trash receptacles, interpretative/educational signage (minimum 3 signs), up to 30,000 sf of concrete paving/sidewalk/trails; up to 17,000 sf of stabilized decomposed granite trails, Restroom facility, age 5 to 12 themed play structure and age 2 to 5 themed play structure with resilient rubber surfacing, Splash Pad with resilient rubber surfacing, Landscaping areas (approximately 166,000 sf) including trees, shrubs, and turf areas, irrigation system, Park lighting to match system in existing park. Finally Phase IV of the development plan will design and construct approximately 2 acres (Phase 4) of the historical park with an overlook of a natural artesian spring and wetlands habitat. There is a 20+/- foot grade difference between the northern portion of the park and the spring basin. The overlook terrace will provide picnic and seating areas for park visitors. This phase will also include a small parking lot, interpretative kiosks, trails, and a signalized crosswalk connecting the park to the adjacent neighborhood.

Maintenance Equipment Replacement Program

Project #: 10538

Project Cost: \$297,000
Previous Cost: \$197,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: The majority of the parks maintenance equipment is over 15 years old. The equipment is overdue for replacement as the normal life expectancy for parks maintenance equipment is 7-10 years. Mowers, verticutters, tractors, and other motorized equipment need to be replaced, as do the trailers that haul them.

These upgrades will increase the efficiency of parks maintenance workers. By avoiding equipment downtime for maintenance, workers will be able to address maintenance on a more timely basis; allowing for a more appealing parks system.

Petitti Pool Upgrades

Project #: 10607

Project Cost: \$430,000
Previous Cost: \$60,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 2
Location: Petitti Pool

Project Description: Installing a new pool slide at Petitti Pool will bring an exciting amenity to the facility, boosting pool usage and encouraging greater community engagement. This addition will create a more inclusive and enjoyable environment, promoting fairness and equity while driving higher attendance. As Petitti Pool currently lacks a pool slide, this new feature will significantly enhance participation and overall usage.

Streetscape on North Las Vegas Roadways

Project #: 10608

Project Cost: \$1,375,000
Previous Cost: \$625,000
O&M Impact: \$0
Department: Parks & Recreation
Ward: 3, 4
Location: (1) Scott Robinson Blvd (Between Lone Mountain Rd and Washburn) (2) Camino Eldorado Pkwy (Between Bent Arrow Dr and Clayton St) (3) Camino Eldorado Pkwy (Between Tropical Pkwy and Gliding Eagle Rd)

Project Description: Park staff has been working with the Southern Nevada Water Authority to identify wasteful water spending, in order to reduce costs and increase moving efficiencies. There are numerous areas throughout the majority of our streetscapes that could utilize the turf reduction program to meet these goals, while actually improving the appeal of each of these locations.

The CIP would identify areas of turf that could be reduced (i.e., borders around trees and grass areas between sidewalks that are not used for any purpose), and provide the funding to replace with an attractive desert landscape. Much of the funding for the project may be recouped through the water district's program, which returns \$3/ sq. ft. up to \$10,000 sq. ft and \$1.50 per square foot thereafter. Parks has identified approximately 125,000 square feet of turf abatement.

125,000 square feet x \$5.00 per square foot = \$625,000 in expenses minus rebate of \$214,875 from SNWA for a net cost of \$410,125.

Our department also has interest in continuing this project after SNWA credits have expired in future fiscal years.

Tropical Breeze Park

Project #: 10648

Project Cost: \$645,354
Previous Cost: \$545,354
O&M Impact: \$0
Department: Parks & Recreation
Ward: 4
Location: Tropical Breeze Park

Project Description: CNLV intends to provide improvements to the parks located North of Craig Rd. These Northern parks were selected due to their age and general condition. Below is the list of scheduled improvements:

Trash Cans
 Barbecues
 Picnic Tables
 Benches
 Playground Equipment
 Trees
 LED Light Conversion
 Playground Surface Rehab
 Sports Field Rehab
 Turf Abatement/Conversion
 Dog Park

Walker Pool Upgrade

Project #: 10605

Project Cost: \$288,607
Previous Cost: \$188,607
O&M Impact: \$0
Department: Parks & Recreation
Ward: 2
Location: Walker Pool

Project Description: The addition of an aquatic climbing wall at Walker Pool is a simple yet effective enhancement that will attract guests of all ages, boosting demand and increasing the facility's amenities. This addition will help draw in new community members and enhance the overall pool experience. A designated drop zone is recommended at the base of the aquatic climbing wall to keep swimmers out of this area. The aquatic climbing wall is modular and can be customized to fit any space and deck configuration. The four panels attach to a stainless steel frame, allowing you to adjust the height and width of the wall to suit your needs. The aquatic climbing wall requires a footprint of 35 square feet of deck space, with 4 feet of clearance behind the wall for a walkway and 5 feet on either side of the wall. The pool's depth determines the height of the wall; for example, a 6-foot water depth is suitable for a 12-foot high wall.

Automated CPR Device Replacement

Project #: 22072

Project Cost: \$200,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: Purchase of automated CPR devices that are utilized to provide high quality, consistent CPR and improve the outcome in cardiac arrest incidents. The current units (AutoPulses) were purchased in 2019 and will be 8-9 years old once the new ones are received. This replacement timeframe is just over the recommended replacement threshold.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Communications Replacement

Project #: 22019

Project Cost: \$1,050,000
Previous Cost: \$100,000
O&M Impact: \$0
Department: Public Safety: Fire
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: Radios, computers and tablets are a very important part of the Fire Department's day-to-day operations. Radios, computers and tablets are used as a key communication tool between two or more firefighters as well as on the scene of an emergency incident. Another way that these tools are a key role in our operations is to be able to communicate with our Dispatch Center. Due to the nature of the Fire Department's business; radios, computers and tablets require replacement more frequently than non-public safety departments. Therefore, a regular replacement schedule for radios is necessary. Additionally, the department will begin with a 5-7 year process of updating its radios for digital encryption for enhanced public safety security.

This project meets Goal #3 "Community Safety", Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Emergency Vehicle Intersection Management System

Project #: 22078

Project Cost: \$1,500,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: N/A
Location: Citywide

Project Description: Currently the fire department utilizes a 3 decade-old technology to manage traffic signals when approaching intersections during emergency responses. Most new intersections have not had the systems added to them and many are in disrepair. New technology allows the intersection preemption system to work in conjunction with the emergency vehicles onboard computers to not only control the approaching intersection but also prepare for the next intersections. This new technology can make entering intersections safer and almost completely eliminate the chances for vehicle accidents. Additionally, the installation of this technology will allow for our police department vehicles to utilize the same system should they decide to install the system in their patrol cars.

This project meets Goal #2 "Infrastructure Enhancements", Goal #3 "Community Safety, and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Equipment Upgrade and Replacement

Project #: 22075

Project Cost: \$1,300,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: N/A
Location: Citywide

Project Description: Each fire department apparatus carries countless, durable firefighting, rescue and medical items that fall in the realm of capital items. These items have to be rotated out of service when reaching their end of life or when significantly damaged. This includes, saws, fans, lighting, gas detectors, air packs, masks, non-disposable medical equipment, patient monitoring devices and much more.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Fire Apparatus - Command Vehicle Replacement (1334)

Project #: 22084

Project Cost: \$1,400,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: N/A
Location: Citywide

Project Description: This project is to acquire a new fire apparatus and related equipment to replace Unit 1334. Once the new engine is received, Unit 1334 will be placed into reserve status. Service demands and nationally accepted, industry standards state that fire apparatus should be used in a frontline capacity for approximately 10-12 years. A complete refurbishment will also be evaluated to potentially save money on this project.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Fire Apparatus - Rescue Ambulance Replacement Program

Project #: 22082

Project Cost: \$4,000,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: N/A
Location: Citywide

Project Description: The City's Rescue Ambulance put approximately 5,000-6,000 miles on them per month. The plan is to keep these units in front line status for 3 years and reserve status for 3 years before replacing. This plan would keep our fleet rotated over a 6-year period. This covers the cost of the unit and related equipment.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Public Safety: Fire

Fire Apparatus - Water Tender

Project #: 22076

Project Cost: \$750,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: N/A
Location: Citywide

Project Description: The department responds to many fire incidents annually in areas on and along I-15, including Apex and dessert areas, that have no water supplies. In order to procure enough water for these fires, several fire engines must be tied up to shuttle enough water within their tanks for these fires. For years, the department was able to request Nellis AFB Fire department for a water tender (water tank truck); however, the base has been unable to release that truck from the base. We believe that it would be a good investment to purchase a water tender to assist in managing these fires and reducing the need for several fire engines on fires such as trash hauler fires and semi-trailer fires.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Fire Training Facility

Project #: 22055

Project Cost: \$6,050,000
Previous Cost: \$2,850,000
O&M Impact: \$0
Department: Fire
Ward: 2
Location: Martin Luther King Boulevard and Brooks Avenue

Project Description: This project is to fund enhancements to the Fire department training grounds; including additional costs for a classroom/office facility, related F,F, & E, the relocation of training props from their current location, and the purchase and installation of additional training props.

This project meets Goal #3 "Community Safety", Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Hazardous Materials Unit and Equipment

Project #: 22074

Project Cost: \$2,200,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: N/A
Location: Citywide

Project Description: The North Las Vegas Fire Department is establishing a Type 3 Hazmat Team that would provide the citizens and businesses of North Las Vegas a quick response to hazardous materials releases and assist in the planning/prevention where hazardous materials are involved. A Type 3 Hazmat team would provide the technical expertise needed to identify and control a release, while also providing decontamination for civilians and responders.

The total request for establishing the hazardous materials response program is \$2,200,000.00. This project request would include the purchase of a Hazardous Materials Response Apparatus, and necessary equipment for the unit and mitigation of a hazardous materials release including but not limited to: radios, computers, hazardous materials personal protective equipment, sampling/testing equipment, and mitigation devices.

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

New Fire Station Apparatus and Equipment

Project #: 22080

Project Cost: \$1,600,000
Previous Cost: \$0
O&M Impact: \$0
Department: Fire
Ward: 1
Location: To be determined

Project Description: This project is to budget for a new fire engine and rescue and related equipment for the potential addition of a new fire station proposed along the I-15 corridor to serve to Apex and Speedway areas of North Las Vegas.

This project meets Goal #3 "Community Safety" and Objective #2. "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Public Safety: Fire

Personal Protective Equipment

Project #: 22023

Project Cost: \$3,700,000
Previous Cost: \$1,050,000
O&M Impact: \$0
Department: Public Safety: Fire
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: As part of NFPA 1981 & 1982, Firefighter Turnout (personal protective equipment) is an essential part of firefighter safety and protection. This equipment protects firefighters from high amounts of heat, potentially dangerous chemicals, and blood borne diseases. This project includes gear, gloves, hoods, helmets, technical rescue PPE, etc. Cost increases accounted for in outlying years along with a large addition of personnel for a new fire station.

This project meets Goal #3 "Community Safety", Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Special Operations Equipment

Project #: 22063

Project Cost: \$1,190,000
Previous Cost: \$190,000
O&M Impact: \$0
Department: Fire
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project is to enhance the technical rescue and hazardous materials special operations capabilities of the Fire department. The department has submitted for a federal earmark for the purchase of a vehicle and equipment for a hazardous materials response vehicle, equipment, and training. A match will be likely required. The project budget for FY26 will aid in that match.

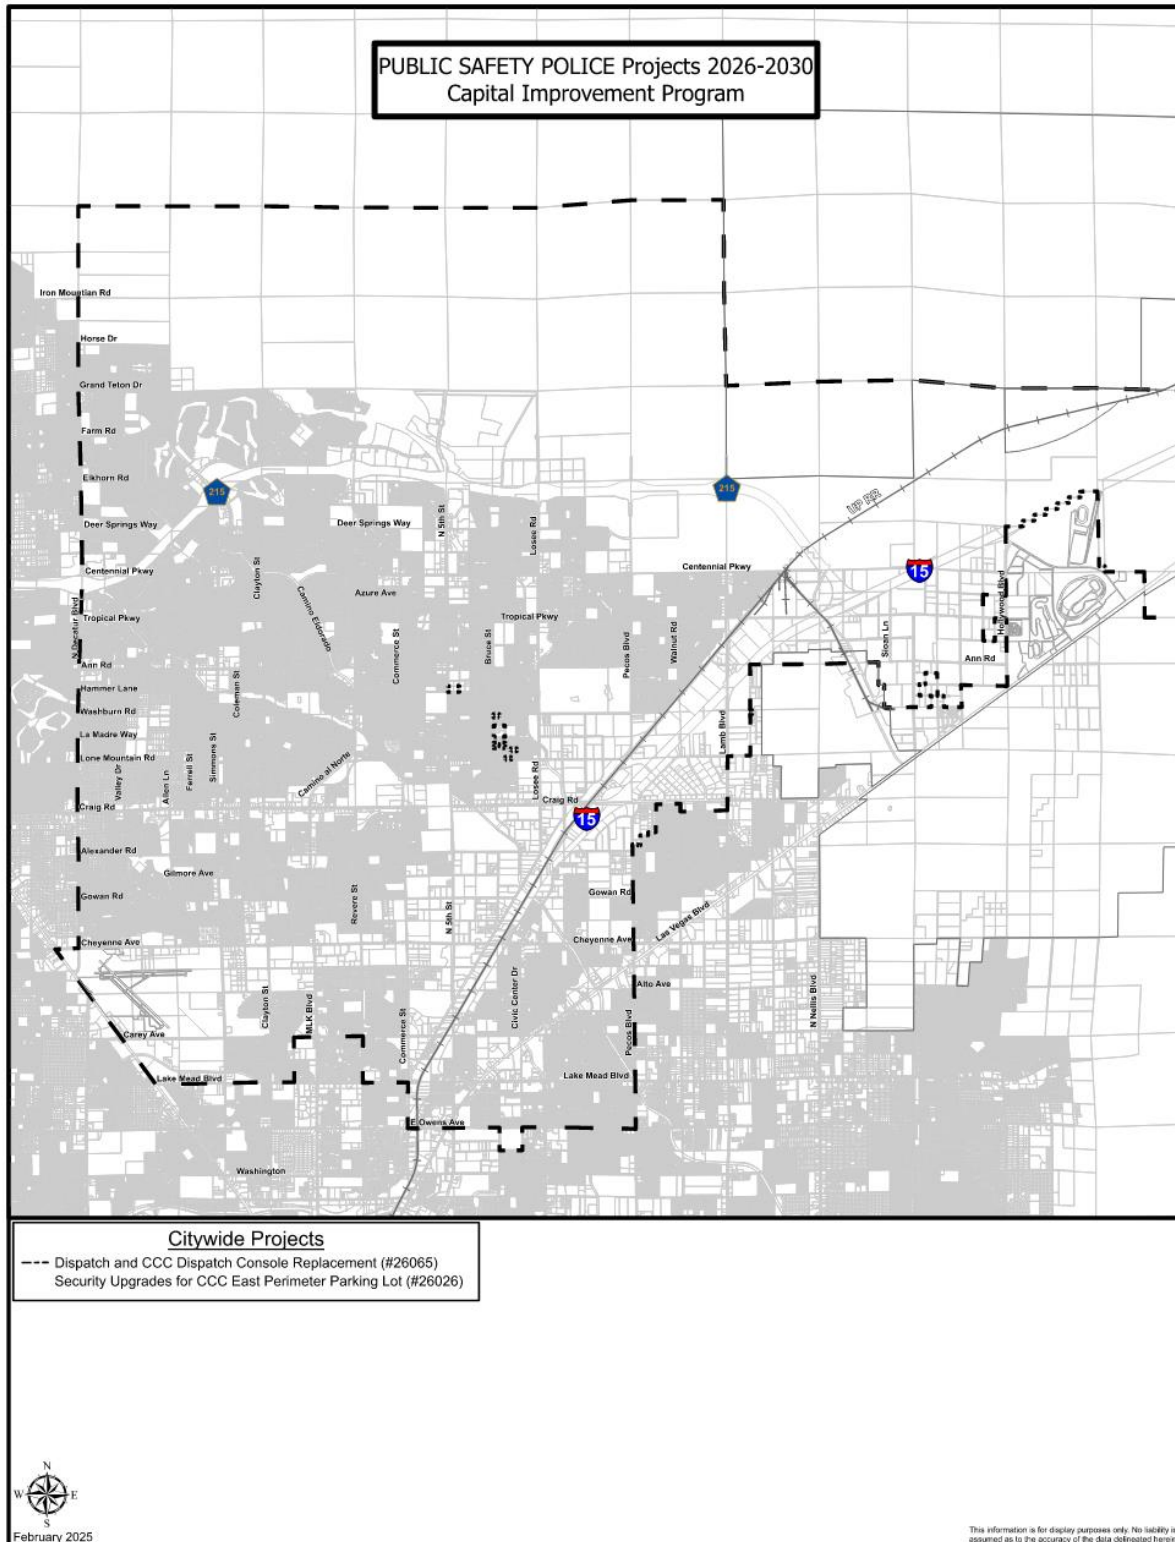

This project meets Goal #3 "Community Safety" and Objective #2 "Expand and modernize public safety facilities and equipment" of the City's Strategic Plan and is included in the Fire department's 5-year strategic vision.

Dispatch and CCC Dispatch Console Replacement

Project #: 26025

Project Cost: \$1,400,000
Previous Cost: \$0
O&M Impact: \$0
Department: Police
Ward: N/A
Location: PD Dispatch and CCC Main Base Control Room

Project Description: The Motorola MCC 7500 Radio Consoles are at their end of life and will need to be replaced:

1. The consoles are equipped with the Voice Processing Module (VPM). Motorola issued a Lifecycle Support Notice and Cancellation Update for the VPM-based MCC7500 dispatch console.
2. Motorola discontinued selling the VPM-based MCC7500, with a final order date of September 30, 2021.
3. The last ASTRO® 25 system release that will support the VPM-based MCC7500 will be the ASTRO system release (referred to as A2026.x at this time) that is shipping on December 1, 2026.
4. The radio system will continue to support the consoles until approximately 2029

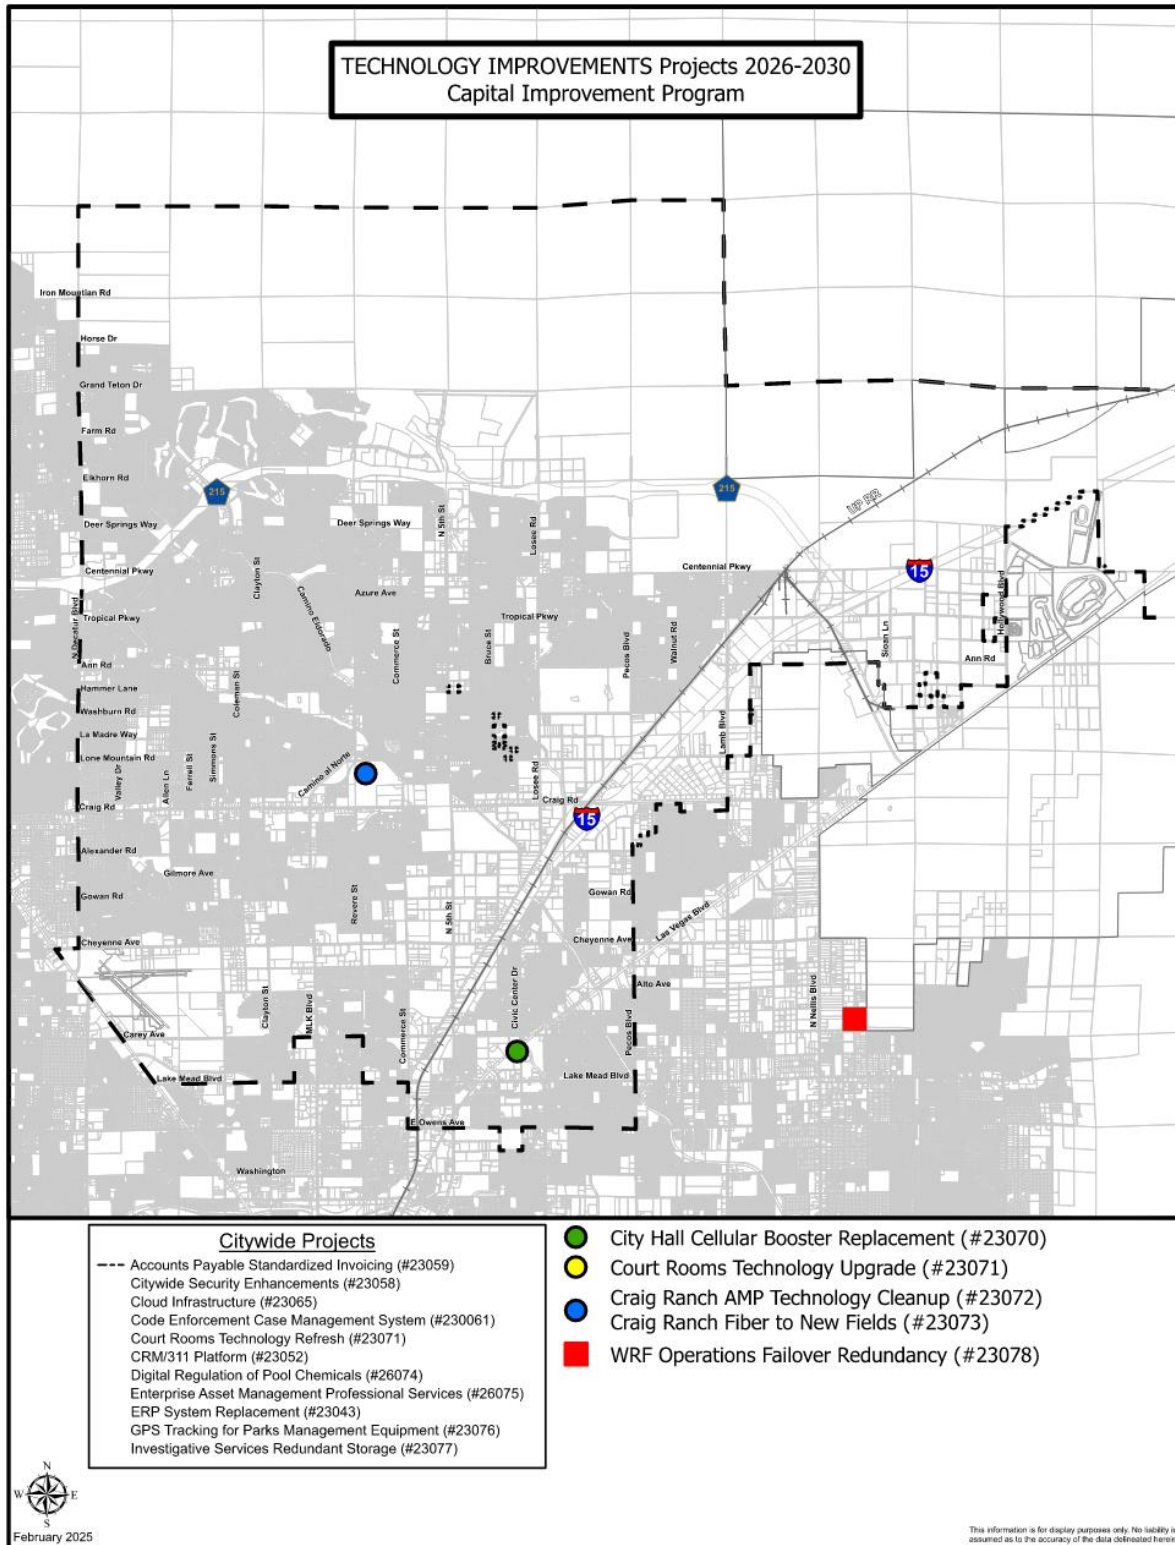

-11 Dispatch Consoles in Dispatch
 -1 AIS for recording Radio Channels
 -2 Dispatch Consoles in CCC Main Base
 -Consoles are approximately \$100,000.00 per unit.
 -Total will be approximately \$1,400,00.00

Accounts Payable Standardized Invoicing

Project #: 23059

Project Cost: \$50,000
Previous Cost: \$0
O&M Impact: \$10,000
Department: Information Technology
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: By standardizing the City's invoicing process it would cut down on the amount of errors due to data entry, the number of people hours it takes to process an invoice and ultimately turn around payments to our vendors faster. This system would need to integrate with our current ERP and any future AP system the City may move to.

City Hall Cellular Booster Replacement

Project #: 23070

Project Cost: \$350,000
Previous Cost: \$0
O&M Impact: \$75,000
Department: Information Technology
Ward: N/A
Location: City Hall

Project Description: The Verizon Distributed Antenna System (DAS), installed in City Hall upon its opening in 2011, was designed to enhance cellular coverage exclusively for Verizon Wireless users. However, the system has now reached its end of service life, leaving the aging hardware with minimal support and limited functionality. Cellular reception in City Hall is mediocre at best. To address this, we propose replacing the existing DAS with a new neutral host system. This upgrade will leverage the latest advancements in technology, providing robust, reliable cellular coverage that extends to all carriers, rather than a single provider. By modernizing the infrastructure, we ensure enhanced connectivity, increased versatility, and long-term support, delivering significant benefits to both staff and visitors at City Hall.

Code Enforcement Case Management System

Project #: 23061

Project Cost: \$320,000
Previous Cost: \$0
O&M Impact: \$36,000
Department: Information Technology
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: Our Code Enforcement Division currently uses a case management system that exists entirely outside of our Technology Ecosystem. The replacement system would need to integrate with our existing systems, have a robust reporting solution, be user friendly and give our constituents the ability to report infractions via their mobile phone and capture camera and GPS data. The system would also need to be able to handle other divisions' case management as well including but not limited to Fire Prevention and Business License Enforcement.

Court Rooms Technology Refresh

Project #: 23071

Project Cost: \$500,000
Previous Cost: \$0
O&M Impact: \$0
Department: Municipal Court
Ward: 1
Location: Municipal Court

Project Description: The technology in the North Las Vegas Municipal Court court rooms are out of date. To facilitate newer means of attending court virtually the technology needs to be refreshed. The audio and video system need to be refreshed to handle bookmarking, on/off the record recordings and must integrate with Microsoft Teams.

CRM/311 Platform

Project #: 23052

Project Cost: \$2,000,000
Previous Cost: \$0
O&M Impact: \$300,000
Department: Information Technology
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: As we transition more of our services online, we need to focus our efforts on those for Citizen engagement. A CRM system that allows for workflow automation, efficient case management, omni-channel communications and data insights would be ideal. This opportunity would give the City the ability to have a single source of truth when dealing with Citizen raised issues.

Digital Regulation of Pool Chemicals

Project #: 23074

Project Cost: \$200,000
Previous Cost: \$0
O&M Impact: \$0
Department: Parks and Recreation
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: In an effort to utilize technology to help parks staff keep our facilities in good working order, a solution to monitor and distribute the necessary pool chemicals to our pools is needed. This system would have mobile capabilities giving the pool maintenance staff the ability to check the chemical levels from anywhere at any time. This would reduce the amount of time staff are driving between facilities allowing them to concentrate on the work at hand.

Enterprise Asset Management Professional Services

Project #: 23075

Project Cost: \$250,000
Previous Cost: \$0
O&M Impact: \$0
Department: Information Technology
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: With the rollout of the City's new enterprise asset management there have been growing pains. The necessity for a best business practice review with the various business units utilizing the system would be ideal. Along with that would be the services to implement those best business practices.

Investigative Services Redundant Storage

Project #: 23077

Project Cost: \$100,000
Previous Cost: \$0
O&M Impact: \$0
Department: Police
Ward: N/A
Location: Investigative Services

Project Description: The Investigative Services division of the North Las Vegas Police Department relies on a central storage repository to securely maintain all active and archived case files critical to its operations. While this storage system was recently upgraded, it currently lacks sufficient redundancies to ensure seamless accessibility in the event of hardware failures. To address this vulnerability, we propose the addition of a replication appliance to the storage. This enhancement will eliminate single points of failure by replicating data in real time, ensuring that all information remains highly available and resilient. In the event of a device failure, investigators will retain uninterrupted access to the data, preventing delays or disruptions in the investigative workflow and reinforcing the reliability of our operations.

WRF Operations Failover Redundancy

Project #: 23078

Project Cost: \$750,000
Previous Cost: \$0
O&M Impact: \$75,000
Department: Utilities
Ward: N/A
Location: Water Reclamation Facility

Project Description: In alignment with the City's Strategic Goal #2 for Infrastructure Enhancement, we propose expanding and enhancing the redundancies within the server and data transport infrastructure at the Water Reclamation Facility. These improvements are critical to supporting the facility's 24/7 operations and ensuring uninterrupted functionality. The proposed upgrades include the implementation of redundant servers, advanced failover solutions, and robust network connections. These enhancements will significantly strengthen system reliability, minimize downtime risks, and provide seamless continuity of operations, reinforcing the facility's ability to meet its critical mission.

ADA Upgrades Program

Project #: 10551

Project Cost: \$2,100,000
Previous Cost: \$1,000,000
O&M Impact: \$0
Department: Public Works
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project involves the replacement of sidewalk and sidewalk ramps, curb and gutter, safety lighting, drainage, road reconstruction, pedestrian crossings, and other improvements in various locations throughout the City. These improvements will provide increased accessibility and mobility, and enhance public safety.

Arterial Roadway Reconstruction Program

Project #: 10280B

Project Cost: \$5,000,000
Previous Cost: \$1,000,000
O&M Impact: \$0
Department: Public Works
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project consists of the design and construction of pavement maintenance strategies for aging arterials and collectors. The method of rehabilitation for individual streets vary from asphalt overlay to complete removal and replacement. This work will also include addressing ADA compliance for the rehabilitated streets. This is part of an annual program to maintain North Las Vegas' infrastructure asset.

Lake Mead Boulevard Improvements

Project #: 10413

Project Cost: \$18,400,000
Previous Cost: \$9,000,000
O&M Impact: \$0
Department: Public Works
Ward: 2
Location: Lake Mead Boulevard between Simmons Street and Losee Road

Project Description: This project will repave Lake Mead Blvd. between Simmons Street to approximately 300' east of Losee Road. In addition to pavement replacement, the project will; address ADA upgrades, install striping, provide enhanced pedestrian crossings, upgrade streetlights, install fiber optic cable, replace and/or install median islands and bus stop pads/turnouts, address utility improvements/adjustments, replace signage as needed, and address appurtenant improvements necessary for a complete project. This is a joint project with the City of Las Vegas.

Major Corridor Pavement Marking Replacement

Project #: 10547

Project Cost: \$10,130,000
Previous Cost: \$530,000
O&M Impact: \$0
Department: Public Works
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project will provide for the replacement of pavement markings within the City for the areas of greatest need. Specific locations for this project will be determined based on a field review by City staff.

Neighborhood Roadway Rehabilitation Program

Project #: 10280A

Project Cost: \$9,000,000
Previous Cost: \$2,000,000
O&M Impact: \$0
Department: Public Works
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project consists of the design and construction of pavement maintenance strategies for aging arterials, collectors, and local streets. The method of rehabilitation for individual streets vary from asphalt overlay to complete removal and replacement. This work will also include addressing ADA compliance for the rehabilitated streets. This is part of an annual program to maintain North Las Vegas' infrastructure asset.

Rice Avenue and Decatur Boulevard

Project #: 10654

Project Cost: \$300,000
Previous Cost: \$0
O&M Impact: \$0
Department: Transportation
Ward: 3
Location: Rice Avenue and Decatur Boulevard

Project Description: This project will widen Rice Ave east of Decatur Blvd to allow for the full utilization of the dual left turn lanes on southbound Decatur. Currently the queue for left turning vehicles frequently spills out into the southbound through lanes which is a safety hazard.

Streetlight LED Retrofit

Project #: 10489

Project Cost: \$10,145,000
Previous Cost: \$4,585,000
O&M Impact: \$0
Department: Public Works
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project will upgrade all High-Pressure Sodium (HPS) streetlights fixtures to Light Emitting Diode (LED) fixtures over the course of 10 years. This will improve visibility on the roadway and reduce power consumption by approximately 50%. The project may also include lighting controls, if additional maintenance and power consumption savings can be realized.

Bio Reactor Air Diffuser Replacement Project
Project #: S0060

Project Cost: \$300,000
Previous Cost: \$240,000
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: 2580 Betty Lane

Project Description: The rubber air diffusers providing air to the bioreactors are reaching the end-of-life cycle and are in need of replacement. There are a total of six bioreactors each having 4,882 diffusers. Typically, we have four of the six bioreactors in service and each year we rotate two of the bioreactors to perform inspections and preventative maintenance. The plan is each year to replace the out of service bioreactor diffusers until the project is completed. This year we would like to try an alternate diffuser manufacturer recommended by the County which will provide cost savings to the City. If these alternate diffusers perform to expectation, we would like to proceed with the new manufacturer. If not, we will go back to the Original Equipment Manufacturer (OEM).

Utilities: Sewer
Bioreactor Coating Failure Repair
Project #: S0062

Project Cost: \$10,200,000
Previous Cost: \$200,000
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: 2580 Betty Lane

Project Description: The current coating system inside the Bioreactor Basins is failing. The existing coating system needs to be removed and a new coating system applied. There are 6 total bioreactor basins, and only 1 basin can be taken down at a time to perform the work. It is estimated we can replace 1 basin per year. The new coating system will protect the concrete basin for a harsh environment that can corrode the concrete.

Garnet Valley Wastewater System
Project #: S0041

Project Cost: \$292,664
Previous Cost: \$202,664
O&M Impact: \$0
Department: Utilities
Ward: 1
Location: Garnet Valley (Apex)

Project Description: The Southern Nevada Water Authority will be undertaking the design, right of way acquisition, and construction of a backbone, sewer collection system for the Apex area that, in general, consists of the following: 5 wastewater lift stations; 43 miles of sewer pipeline (8 - 48 inches); and 8 miles of force main pipe (14 - 30 inches). Once complete, this project will be turned over to the City for ownership and maintenance. City coordination of the right of way and the Apex sewer collection system with the proposed improvements will be required through all phases.

Utilities: Sewer

Losee Road/LV Wash Diversion Sewer

Project #: S0039

Project Cost: \$8,500,000
Previous Cost: \$1,253,000
O&M Impact: \$0
Department: Utilities
Ward: 1, 2
Location: Las Vegas Wash at Gowan Road
 between Losee Road and Civic Center
 Drive

Project Description: Approximately 85 percent of all wastewater flows generated within the city are generated north of Interstate 15 (I-15). Ultimately, these flows cross I-15 through two 27-inch sewer mains in the Las Vegas Wash Channel, at Gowan Road, between Losee Road and Civic Center Drive. The north 27-inch main conveys flows from a much larger portion of the city's service area than the south 27-inch main, and it is at or near capacity. Failure to upgrade and/or construct a relief sewer may result in sanitary sewer overflows upstream and limit the ability to develop within the north and northwest portions of the City until additional capacity is added at the I-15 crossing location.

Utilities: Sewer
Nellis Industrial Park Interceptor Sewer
Project #: S0038

Project Cost: \$4,600,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: Craig Road from Lamb Boulevard east to Nellis Boulevard, then south in Nellis Boulevard to Las Vegas Boulevard

Project Description: Wastewater flows generated in the Nellis Industrial Park, located within the city, are currently discharged to a Clark County Water Reclamation District (CCWRD) sewer main in Craig Road and are conveyed to the CCWRD Wastewater Reclamation Facility for treatment; the city is billed for treatment costs. CCWRD has an existing 18-inch sewer main in Craig Road that is currently not in service and could be made available to convey the Nellis Industrial Park flows east to Puebla Street. From that point, a new sewer main, approximately 4,300 linear feet, is proposed to be constructed in Craig Road from Puebla Street east to Nellis Boulevard, then south in Nellis Boulevard to Las Vegas Boulevard to connect to the city's Northeast Interceptor Sewer. Completion of this project will allow for the Nellis Industrial Park to be served solely by the city and would eliminate the need for the interlocal agreement that is currently in place with CCWRD, eliminating the payment of treatment costs totaling approximately \$500,000 per year.

Utilities: Sewer
Septic Conversion - Palomino Estates
Project #: S0061

Project Cost: \$10,625,000
Previous Cost: \$150,000
O&M Impact: \$0
Department: Utilities
Ward: 3
Location: West side of Decatur Boulevard,
 between Craig Road and Lone Mountain
 Road

Project Description: The Palomino Estates subdivision currently has residences discharging their domestic sewer into a septic tank. This project will install a sewer mainline within this subdivision that will enable the residents to abandon the septic tank and tie into the new sewer mainline. This will allow the sewer to be treated and routed back to Lake Mead as recycled water. This promotes water re-use, a cause that the City of North Las Vegas highly values.

Utilities: Sewer
Sewerline Oversizing
Project #: S0002

Project Cost: \$7,526,186
Previous Cost: \$5,526,186
O&M Impact: \$0
Department: Utilities
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project consists of oversized developer sewer lines to provide additional capacity for future development. Oversizing typically occurs where new areas are being opened up (pioneered) and where previously oversized sewer lines are being extended. By oversized developer sewer lines, additional capacity is provided for future development and the city's wastewater collection system develops in an orderly manner. Future tie-ins and cutting of pavement can be minimized and parallel sewer lines avoided.

Project #: S0046

Project Cost: \$5,285,054
Previous Cost: \$2,360,054
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: Northeast Corner of Betty Lane and Carey Avenue

Project Description: This project will establish a capital fund to enhance, maintain, and address needed repairs in various elements of the waste water operations for the city. This effort will include unanticipated repairs and other capital infrastructure elements to keep the system operational. In addition, the Facility's (5) orthophosphate analyzers are over 13 years old and have reached the end of their life-cycle and repairs to the existing units are no longer cost effective.

Utilities: Sewer
WRF Membrane Blower
Project #: S0050

Project Cost: \$3,000,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: 2580 Betty Lane

Project Description: Presently, the Water Reclamation Facility (WRF) operates two membrane blowers which provide air scouring for the membrane system. When the facility was built, it was anticipated that an additional blower would be necessary to accommodate membrane expansion. For this reason, a concrete pad, electrical cabinet, conduit and discharge piping were included in the project.

The city has approved and is moving forward with the WRF membrane system replacement and expansion. Current air demands require the two existing blowers to run simultaneously, leaving the process vulnerable in case of a mechanical failure or when maintenance is required. The addition of the membrane blower will provide system coverage redundancy and additional air scouring capability that will provide a more reliable process that is able to meet future expansion needs.

Project #: S0063

Project Cost: \$540,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: 2580 Betty Lane

Project Description: Current laboratory configuration is suited for a staff of 2, running process control tests while disposing of samples daily. The layout of the current lab prevents the addition of new equipment, storage, or work areas without creating a hazard. With future plant expansion, and with the trend towards more stringent permit requirements, the process control work load alone will necessitate additional laboratory staff.

Since the plant came online in 2012 our permit compliance testing has been handled by external labs, which have highly variable quality control and turnaround times on their analysis. At a minimum, expansion will allow us to preserve our own samples, and give redundancy when they are mishandled by the external lab. Should it prove beneficial to move to in-house compliance testing for our daily samples, we will also need to have space to preserve and store samples so that they can be tested in the most cost-effective manner. The expansion of the lab would also allow us to separate wet chemistry from microbiology areas, which is a state requirement for certified labs.

WRF Plant Expansion
Project #: S0067

Project Cost: \$117,040,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: 1, 2, 3, 4
Location: 2580 Betty Lane

Project Description: As a result of the City's growth, the Water Reclamation Facility (WRF) is preparing for a rise in influent flows over the next 10 years. A headworks loading study is currently underway to estimate future influent flows and to identify the most effective approach for phasing the facility's expansion. Following the determination of the phasing plan, the Utilities department will commence the design process for the expansion and initiate construction.

Utilities: Sewer
WRF Solids Building Centrifuge Expansion
Project #: S0040

Project Cost: \$7,950,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: 2580 Betty Lane

Project Description: This project includes the installation of two centrifuges and ancillary equipment in the existing solids building at the Water Reclamation Facility (WRF). With the current WRF Membrane Bio Reactor expansion likely to be completed over the next 5 years, which will increase plant capacity by 40 percent and with projected influent flows increasing by almost 50 percent, the additional centrifuges are necessary to accommodate future anticipated growth locally and from Apex. Apex's anticipated flow is projected to be 7-9 MGD over the next ten years.

Currently staff is operating existing equipment at maximum capacity. The addition of two centrifuges will allow for current staffing levels to handle increased flows and ensure proper coverage during equipment shutdowns and preventive maintenance, eliminating the possibility of violating WRF discharge permit.

Under the delivery, the work also includes rehabilitating the aging polymer system that will provide a reduction in chemical consumption to dewater the solids, providing for a more efficient and cost-effective process. The work will also address the much needed exhaust system upgrade.

WRF VFD Replacement
Project #: S0068

Project Cost: \$655,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: 1, 2, 3, 4
Location: 2580 Betty Lane

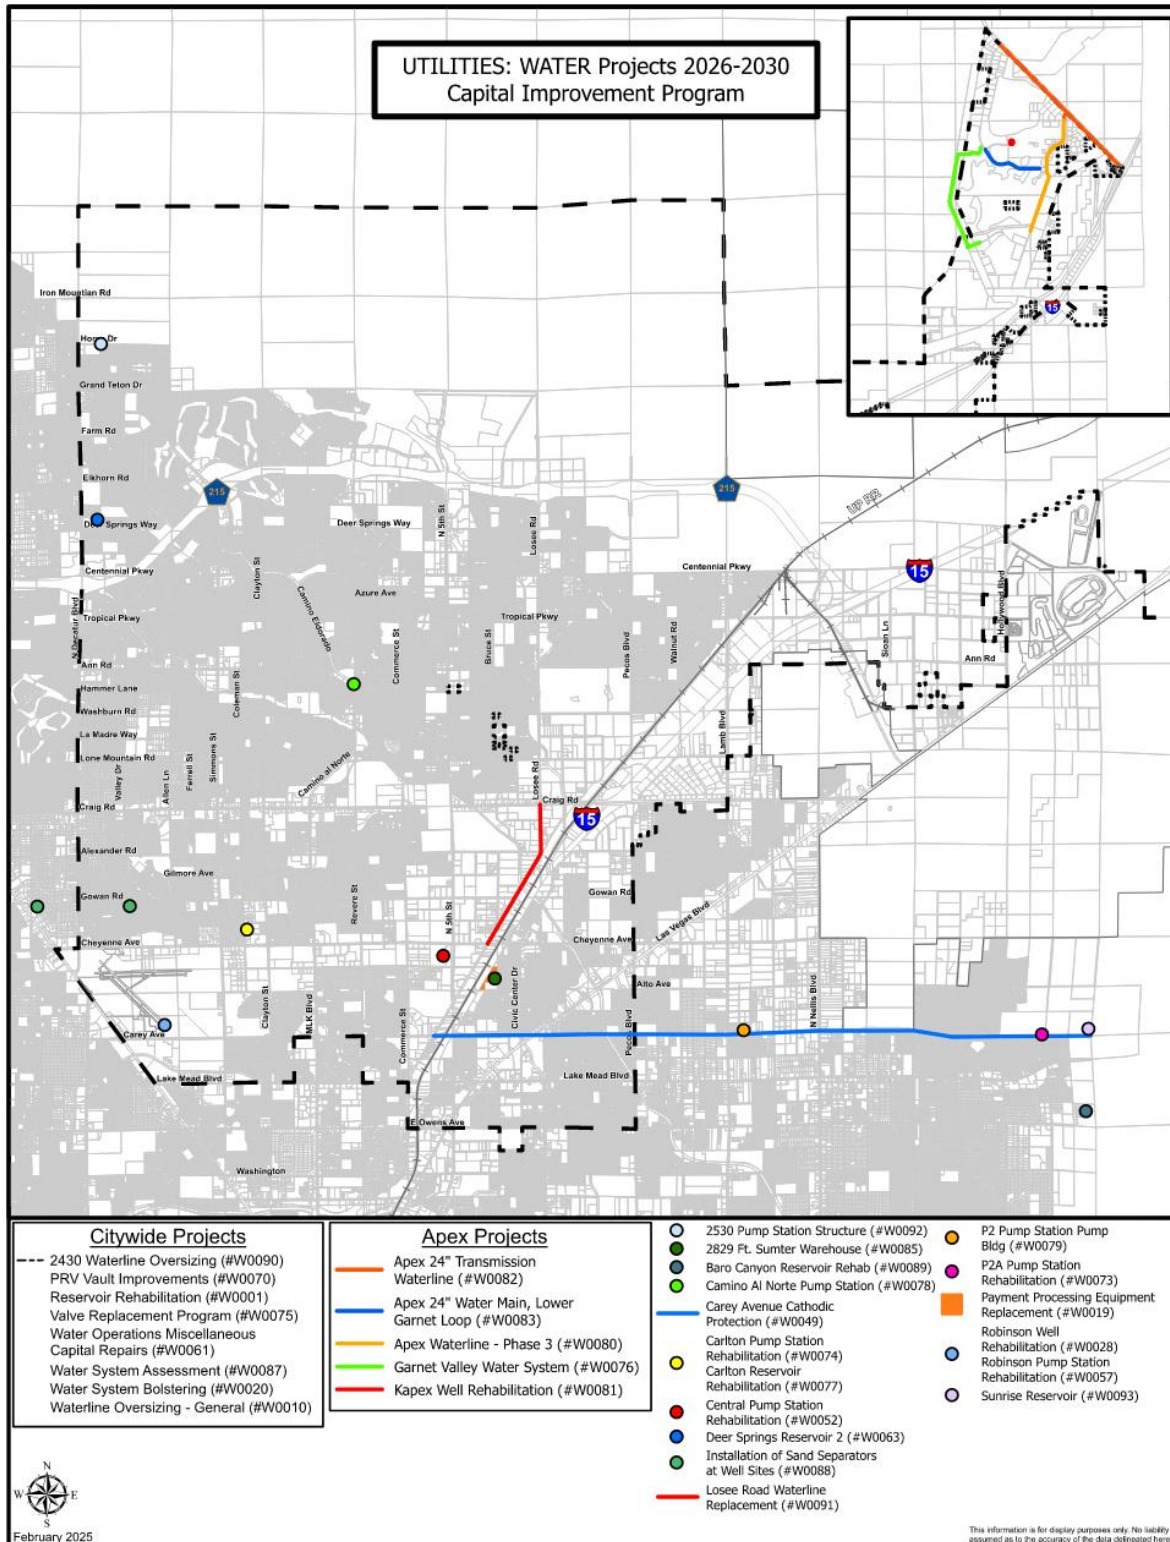

Project Description: The Water Reclamation Facility's (3) Influent Pump Stations (IPS) and (5) Return Activated Sludge (RAS) pump VFDs (variable frequency drives) are over 13 years old and are no longer supported by the manufacturer. In the event of a failure, long lead times and along with timely electrical cabinet retrofits would place the WRF operations in a vulnerable situation which could interrupt system processes.

2430 Waterline Oversizing
Project #: W0090

Project Cost: \$12,000,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: 1
Location: Elkhorn Road from Losee Road to Lamb Boulevard

Project Description: This project consists of oversizing approximately 2 miles of developer water lines from 24" to 36" at Elkhorn Rd. from Losee Road to Lamb Boulevard to provide additional capacity for future development. By oversizing developer waterlines, additional capacity is provided for future development and the city's water system develops in an orderly manner.

Utilities: Water
2829 Ft. Sumter Warehouse
Project #: W0085

Project Cost: \$945,000
Previous Cost: \$90,000
O&M Impact: \$0
Department: Utilities
Ward: 1
Location: 2829 Ft. Sumter

Project Description: The design and construction of a 4,000 s.f. prefabricated warehouse building to house parts, materials and equipment that are vulnerable to environmental effects and theft. Currently water valves, tees and other accessories that have been exposed to the elements for extended periods of time cannot be used within our system in accordance with local regulations. A facility to preserve and protect our parts inventory is needed to curtail routine replacement of parts due to weather aging. The building will have electricity, air cooled with an eyewash station. No underground sewer or water. The warehouse can also be used as storage for when the City pre-purchases parts for CIP projects because of the long lead times on many parts and accessories we are currently seeing. The warehouse will be located in the southwest parking lot at Ft Sumter.

Apex Waterline Oversizing - Phase 3
Project #: W0080

Project Cost: \$26,830,356
Previous Cost: \$13,937,780
O&M Impact: \$0
Department: Utilities
Ward: 1
Location: Apex Industrial Park

Project Description: This project provides for the design and construction of the 3rd phase of the City's oversized waterline to Apex, as reflected in the Oversizing Agreement for Public Water between HR North Vegas LP and the City of North Las Vegas. This approach has been used previously to construct Phase I and Phase 2 of the City's Apex Waterline which are currently under construction. Phase 3 will extend the City's Apex water main an additional 22,000 lineal feet to provide service for an expanded portion of the Apex Industrial Park. Work includes upgrading the proposed 22,000 L.F. ~ 16" waterline to a 24" waterline including upgrading additional waterline appurtenances. The City will only pay for the upgrade to the 24" waterline. Work also includes construction of a 2.25 million gallon reservoir funded by the developer.

Utilities: Water
Camino Al Norte Pump Station
Project #: W0078

Project Cost: \$2,410,614
Previous Cost: \$10,614
O&M Impact: \$0
Department: Utilities
Ward: 4
Location: East side of Camino Al Norte south of Ann Road

Project Description: Presently the Camino Pump Station has three pumps which provide water to pressure zone 2330. Currently two of the pumps are capable of pumping 3000 GPM and the other 250 GPM. When the pump station was built, it was anticipated that an additional 3000 GPM pump would be necessary to meet future demands. For this reason, a concrete pad, electrical cabinet, conduit and piping were included in the project.

Due to equipment reaching the end of its lifecycle, it is recommended that all pumps, valves and electrical components be replaced and the additional 3000 GPM pump installed. Furthermore, current water demands have made it necessary to run the existing pumps at maximum capacity at times. This situation may leave the system vulnerable in the event of a fire, mechanical failure or when maintenance is required. New equipment and the additional pump will provide system redundancy and additional flow capability providing a more stable and reliable water system for our customers.

Carey Avenue Cathodic Protection
Project #: W0049

Project Cost: \$1,202,425
Previous Cost: \$719,074
O&M Impact: \$0
Department: Utilities
Ward: 1
Location: Losee Rd. to Los Feliz St. (approx.)

Project Description: This project involves the replacement of the cathodic protection system on 35,640 linear feet of 36-inch steel water main located on Carey Avenue between Losee Road and Los Feliz Street. The pipeline was installed in 1973, and many of the cathodic protection anodes along the alignment are depleted and in need of replacement. Replacement of the system will prevent future corrosion of the steel water main and extend its service life.

Utilities: Water
Carlton Pump Station Rehabilitation
Project #: W0074

Project Cost: \$2,000,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: 2
Location: 3304 Coleman Street

Project Description: The Carlton Pump Station is located near Coleman Street and Cheyenne Avenue. This pump station provides water to the 2330 pressure zone when needed to support the Deer Springs Reservoir. Over the last two years, water outages have required this pump station operate 24/7. In the event of a water outage from Southern Nevada Water Authority, this pump station is also used to move water from the Carlton Tanks to the Deer Springs Tank. This pump station is a critical part of the water system and is needed to move water to other critical zones.

The pump station was built in 1990. It needs to be rehabilitated/modernized and also needs a building enclosure for the pumps in accordance with current water distribution standards.

Deer Springs Reservoir 2
Project #: W0063

Project Cost: \$9,394,000
Previous Cost: \$3,648,808
O&M Impact: \$0
Department: Utilities
Ward: 3
Location: Deer Springs Way and Decatur Boulevard

Project Description: The 2330 pressure zone is one of the city's highest zones and is served by one 5 million gallon water reservoir constructed in 1998. During a 15 hour Southern Nevada Water Authority (SNWA) emergency water outage, operations had to ensure this reservoir was able to provide the volume of water needed for this pressure zone. This project will add an additional 5 million gallons of storage adjacent to the existing tank and provide reliable flow and capacity.

Garnet Valley Water System

Project #: W0076

Project Cost:	\$288,782
Previous Cost:	\$198,782
O&M Impact:	\$0
Department:	Utilities
Ward:	1
Location:	Garnet Valley (Apex)

Project Description:

The Southern Nevada Water Authority will be undertaking the design, right of way acquisition, and construction of a 20MGD transmission main from the Grand Teton Reservoir to the Apex area, which will include a portion of distribution water line to be turned over to the City once complete. In general, the project consists of the following: 18 miles of pipeline (16 - 24"); 1 reservoir (4 MG); 3 pumping stations (5 MGD/16 hr); and 3 forebays (1.2 MG/forebay). Once complete, only the portion of distribution system will be turned over to the City for ownership and maintenance. City coordination of right of way and the Apex water distribution system with the proposed improvements will be required through all phases.

Project #: W0091

Project Cost: \$4,100,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: 1
Location: Losee Road (Cheyenne to Craig Road)

Project Description: This project will replace roughly 2 miles of aging 10-inch asbestos concrete pipe that has reached the end of its operational lifespan. Over the past five years, this waterline has encountered numerous failures, resulting in service interruptions for customers and traffic congestion during repair activities.

Utilities: Water
P2A Pump Station Rehabilitation
Project #: W0073

Project Cost: \$5,031,000
Previous Cost: \$590,000
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: 7100 East Carey Avenue

Project Description: The P2A Pump Station provides water to the Sunrise reservoir, which supplies the north 2145 pressure zone. Due to recent development growth, this pump station has had difficulty providing enough water to overcome system demands to allow the tank to fill. While the pump station was enclosed in a building around 1997, the pumps predate this by several years. This project includes upgrading the pumps to increase output, and upgrading the electrical controls to modern standards. Upgrading this pump station would directly support the growth in the 2145 zone, specifically the Speedway area.

Utilities: Water
Payment Processing Equipment Replacement
Project #: W0019

Project Cost: \$1,296,722
Previous Cost: \$1,096,722
O&M Impact: \$0
Department: Utilities
Ward: 2
Location: 2829 Fort Sumter Drive

Project Description: The bill payment processing equipment is due for a replacement. This equipment includes payment kiosks, Interactive Voice Response (IVR) System, various billing printers, scanners, an insert machine, computer hardware with lockbox software, and bill payment software used for payment processing. Much of the equipment is administered through third party vendors and must be replaced as part of the replacement cycle.

The Utilities department has an Interactive Voice Response (IVR) system which allows customers to dial in by phone, check their account status, and make payments. It allows for Utilities customers to do 24/7 self-service while offloading a substantial amount of work from the Utilities call center team. This IVR system was originally implemented in 2007 and is now out of date. It runs on old equipment, needs to be brought up to date to meet modern security standards, and the voice menus and recordings need to be refreshed. There are risks of the existing system failing, being unable to process payments, and being a security liability. The goal of this CIP is to replace the existing system with a modern and highly secured cloud based IVR solution which will both enable continuation of IVR services and improve its usability.

Utilities: Water
PRV Vault Improvements
Project #: W0070

Project Cost: \$5,450,000
Previous Cost: \$1,950,000
O&M Impact: \$0
Department: Utilities
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This annual rehabilitation and upgrade program will improve existing pressure regulating valves (PRV) and their vaults, which are critical to its operation, within the city's water distribution system. The PRVs allow water to flow between pressure zones either on demand from the lower zones or as a relief for the high-pressure zones. Many of the valves in our system are over 20 years old and are located in vaults that are in need of adjustment or reconstruction to meet current standards. Problems encountered include a lack of space to access all sides of the valve, water infiltration causing excessive corrosion on the valves and piping, and valves outside of the vault that are needed during maintenance and are often located in traffic lanes. Additionally, some of these vaults were constructed using grade rings that do not address the required structural and sanitary conditions. A combination of all these factors create an environment that damages existing infrastructure and creates safety hazards. This program will upgrade approximately four PRV vaults each year to current construction and Environmental Protection Agency (EPA) standards. There are more than 50 of these PRV's in our water system.

Robinson Pump Station Rehabilitation
Project #: W0057

Project Cost: \$1,250,000
Previous Cost: \$140,953
O&M Impact: \$0
Department: Utilities
Ward: 2
Location: 4201 West Cartier Avenue

Project Description: The Robinson Pump Station provides water to the 2430 pressure zone, serving the former Texas Station and Fiesta Casino area. It was constructed in 1993 and consists of three pumps and motors. The pumps and motors need to be rehabilitated, the Motor Control Centers (MCC) need to be replaced and a shelter needs to be built over the pumps and panels to protect them from the environment in accordance with current water distribution standards.

Robinson Well Rehabilitation
Project #: W0028

Project Cost: \$4,027,720
Previous Cost: \$238,720
O&M Impact: \$0
Department: Utilities
Ward: 2
Location: 4201 West Cartier Avenue

Project Description: The Robinson Well provides groundwater to the 2430 pressure zone, serving the former Texas Station and Fiesta Casino area. The well has deteriorated and is no longer in service. Well rehabilitation needs to be performed in accordance with current water distribution standards which will involve drilling a new well in close proximity to the defunct well and equipping it accordingly.

Valve Replacement Program
Project #: W0075

Project Cost: \$7,000,000
Previous Cost: \$2,000,000
O&M Impact: \$0
Department: Utilities
Ward: N/A
Location: Citywide

Project Description: Replace various broken and/or leaking water valves throughout the city. The city's water system is aging and includes many failing or non-functioning valves that cause frequent maintenance issues for the Utilities Department. Key valves may have to be replaced on an emergency basis; however, an annual replacement program is needed to provide a more proactive and systematic approach to address this issue.

Waterline Oversizing - General
Project #: W0010

Project Cost: \$2,400,000
Previous Cost: \$400,000
O&M Impact: \$0
Department: Utilities
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This project consists of oversizing developer water lines to provide additional capacity for future development. Oversizing typically occurs where new areas are being opened up (pioneered) and where previously oversized waterlines are being extended. By oversizing developer waterlines, additional capacity is provided for future development and the city's water system develops in an orderly manner. Future taps and cutting of pavement can be minimized and parallel pipelines avoided.

Water System Assessment
Project #: W0087

Project Cost: \$510,000
Previous Cost: \$0
O&M Impact: \$0
Department: Utilities
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: With the aging infrastructure, the City's domestic water line system has experienced numerous failures at various locations warranting emergency repairs. To better facilitate and manage these corrective measures, a systematic approach is needed where this assessment will provide an inventory of the City's water network system, categorize and rank the domestic water lines based on variables such as age, material type, depth of cover over the roadway profile, and if it meets current code culminating in providing the mitigation measures needed in concert with developing a strategy to address the cost and phasing of such work.

Project Description: This project consists of the design and construction of water mains to improve the capacity, reliability and water quality within the city's water distribution system. The water system model provides staff with information regarding system constraints and is also used as a tool to identify options to improve the system. System improvements may consist of replacement of undersized mains or main extensions constructed to eliminate dead-ends and provide system looping.

Fleet Replacement Program

Project #: 25001

Project Cost: \$59,807,812
Previous Cost: \$12,416,850
O&M Impact: \$0
Department: General Services
Ward: 1, 2, 3, 4
Location: Citywide

Project Description: This program reflects the projected fleet vehicle replacement proposed annually. Due to budget constraints, this funding will only be used when absolutely necessary. Vehicles selected for replacement will be prioritized based on criticality of equipment, mileage/hour meter readings, age, maintenance cost, and down time.
