**STAFF COMMENTS AND BACKGROUND INFORMATION:**

Increased development activity coupled with limited staff in the Development & Flood Control Division of the Public Works Department has made it necessary to enter into a Professional Engineering Services Agreement with VTN Nevada for the purpose of providing an expedited review option for the development community.

Currently, review times using Public Works staff can be extended and varied. This agreement allows developers the option of paying an additional fee to be provided with a guaranteed turn-around time for their Public Works submittal, a service that has been previously requested by the development community.

The agreement can be terminated by the City, with or without cause with proper prior written notification, and the City is not responsible to pay the consultant more than the City receives in payment from a developer opting to use the expedited review service.
